

**PONDICHERRY ENGINEERING COLLEGE
DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
M.TECH. – DISTRIBUTED COMPUTING SYSTEMS**

PROGRAM EDUCATIONAL OBJECTIVES

PEO 1: Core Competency

To acquire a comprehensive knowledge of distributed system and networking concepts and apply for investigation of real world problems.

PEO 2: Versatility and Diversification

To garner interdisciplinary knowledge for attaining competitive edge and aligning to industrial needs.

PEO 3: Research , Innovation and Entrepreneurship

To realize the significance of innovation in research and educate the facets of entrepreneurship complemented with ethical attitude and professionalism.

PEO 4: Lifelong Learning

To emphasize the need to pursue life-long learning and to stay relevant in emerging technology trends.

**PONDICHERRY ENGINEERING COLLEGE
DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
M.Tech. – DISTRIBUTED COMPUTING SYSTEMS
PROGRAM OUTCOMES**

- PO1** An ability to demonstrate expertise in the area of Distributed Computing System.
- PO2** A know how of appropriate tools and practices for the specification, design, implementation and evaluation of Distributed Computing System.
- PO3** The ability to work both independently and as a team member encompassing time management and organizational skills.
- PO4** A commitment for life-long learning with professional and ethical responsibility.
- PO5** An ability to independently carry out research/investigation and write a substantial technical report.
